40FT Small 700

The version that saves the most ocean freight

This 40-foot small 700mm expandable container house is the most cost-effective version for sea freight. With an area of 57 square meters and a folded dimension of 11800mm x 700mm x 2480mm, 3 units can be loaded into each 40-foot high-cube container. It is ideally suited for rapid mass construction needs, such as project offices, miner accommodations, and earthquake relief efforts.

20FT 2-Story Villa

Introduction This unique two-story house is crafted from two 40-square-meter containers, with each floor featuring a 13-square-meter terrace for ample outdoor space. An internal spiral staircase connects the two floors, offering both convenience and a touch of elegance.

Ground Floor The ground floor includes a living room, kitchen, public bathroom, and dining area, making it an ideal space for entertaining guests.

Second Floor The second floor features a relaxation area, three bedrooms, and a bathroom with separate dry and wet zones, perfect for rest and relaxation.

Design Highlights The house features large floor-to-ceiling windows and glass curtain walls, with an interior in a modern rustic-luxury style that creates a cozy and upscale atmosphere. This design, known as "wabi-sabi," is perfect for those who appreciate comfort and contemporary living. The exterior layout and appearance can also be customized to suit your preferences.
